

At the same time feel free to respond to any of the questions that you have read here. Please

Steel Interchange
Modern Steel Construction
East Wacker Dr.
Suite 3100
Chicago, IL 60601

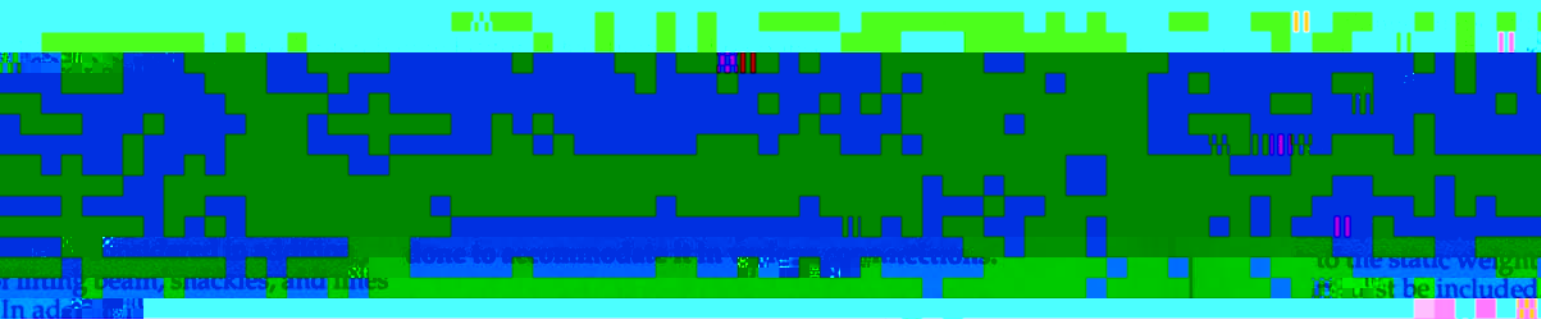

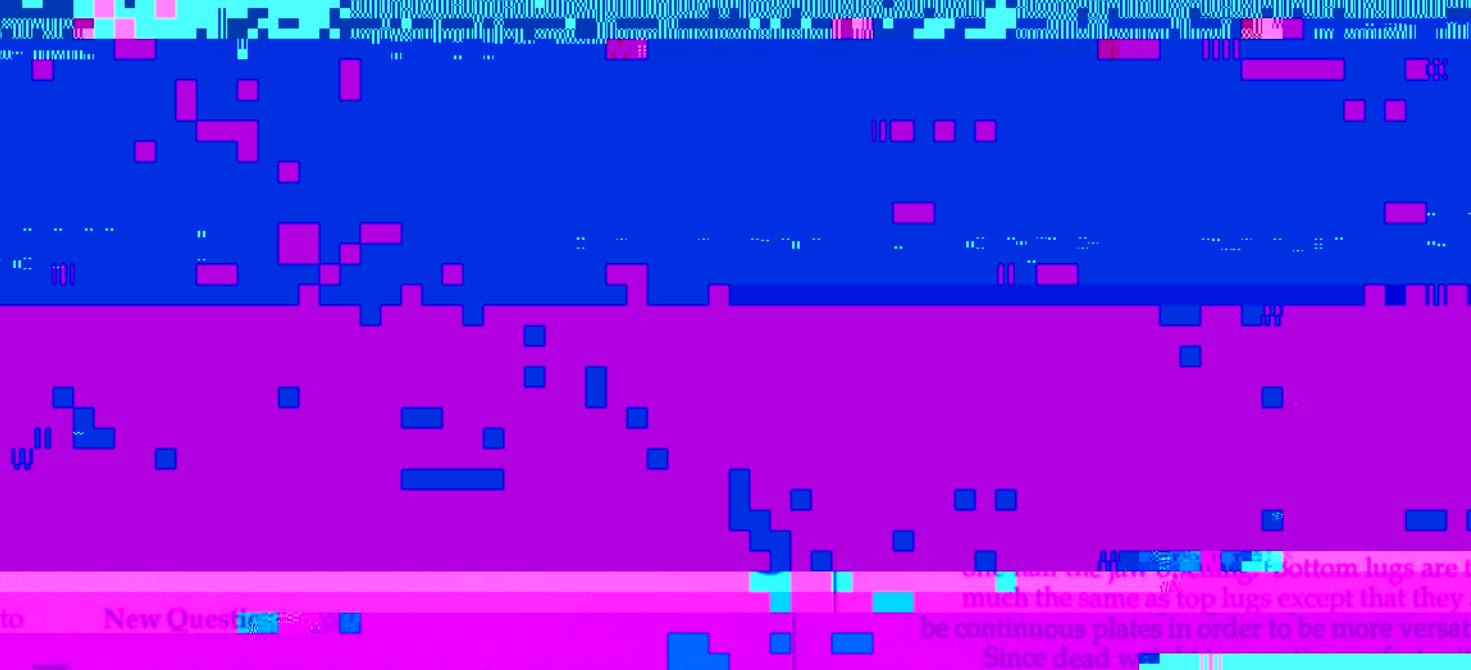

Answers and/or questions should be prepared on 8 1/2" x 11" spaced. Submittals that have been prepared for word processing are appreciated on computer diskette (3 1/2" or 5 1/4" format) or in ASCJI (annat).

The opinions expressed in Steel Interchange do not necessarily represent an official position of the American Institute of Steel Construction, Inc. It is recognized that the design of a structure is within the scope and expertise of a professional engineer, architect or other licensed professional in the application of principles to a particular structure.

Information on ordering AISC publications may be obtained from the office at (708) 414-0800, (312) 261-3800, (312) 49-5200, (606) 935-1849, Telex 40363.

Street Interchange

may be considerably smaller than the hole.

use must be considered. An effective way to account for these unknowns is to apply an appropriate safety factor. The lugs shouldn't be thicker than 5/8". Can these rules be applied to the design of the lugs and clips?
